

FIELD SERVICE ENGINEER

Midlands based – With regular cover across the UK and Ireland

We are looking for a highly motivated, capable and experienced Field Service Engineer to provide servicing and repairs on some of the world's finest Food Processing and Bakery Machinery

- Knowledge of PLCs would be a distinct advantage but is not essential
- Electrical qualifications are required plus relevant experience with food processing/bakery plant.
- You will need first class mechanical & electrical/service and fault-finding engineering skills
- Be customer focused with good communication and administration skills, be computer literate
- Have the capacity to work under pressure on your own without supervision and to use your initiative, problem-solve, work alone or in a team with the ability to multitask
- The willingness to be flexible and be self-reliant with excellent time management skills
- Ensure all work is conducted in accordance with written procedures /instructions and adhere to Health & Safety requirements and guidelines
- Willing to travel across Europe for training when required
- Clean driving licence
- Competitive salary and benefits package, plus van, specialist tools, mobile phone, company credit card and iPad provided.

EPP Ltd are one of the leading suppliers of high-quality processing equipment to the food and bakery industries, this appointment is to further strengthen our after sales support that has served our many customers for over 54 years.

If you feel that you possess the qualities which we require and are keen to take up an exciting new challenge, then please email: recruitment@eppltd.co.uk

STRICTLY NO AGENCIES
